PROJECT INTENT

- Redevelop a flexible, robust Partner Database (PDB) that will allow us to efficiently manage and maintain Education Learning Partner and instructor data records

- Provide a Training Evaluation System (TES) for our Partners and internal staff to conduct online surveys of a student's training experience after participating in classroom or online training courses

- Delivery of course completion & project completion Certificates

- Provide a real-time, visualized, web-based reporting system that allows us to monitor the overall training performance of partners and instructors

AUTODESK.

PROJECT SCOPE

User-Friendly
• Easy to navigate across three main modules: Partner Database, Training Evaluation System and Reporting

Easy Management
• Enable users to store, modify, query and manage students, partners and instructors profile

Synchronization
•To maintain the data integrity of the system and streamline the data management process
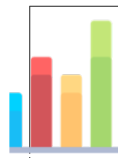

Mobility
•Redevelopment of the PDB and TES system in accordance to the Internet and Mobile Solution

Security
•Enhance the validation process to prevent the misuse of course code for the generation of fake certificate
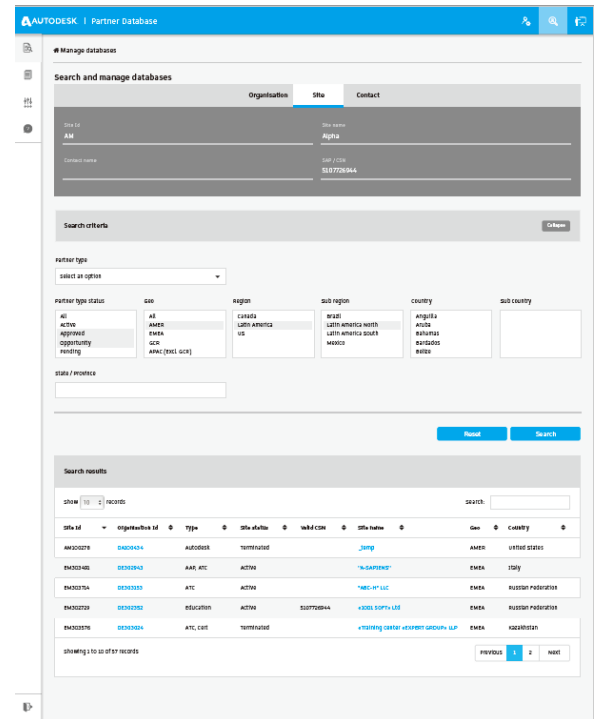

Reporting
•Ability to create a real-time analytic dashboard to efficiently monitor the quality learning experience delivered by partners

USER-FRIENDLY

- Remove all redundant sections, pages & search steps

- A refresh, clean and minimalist UI design concept

- Easy navigation between different modules

- Seamless transit to new planform with intuitive design concept

EASY MANAGEMENT

- User roles and usage rights permission:
    - Student (only access to online evaluation form)
    - Level 1- Partner Read Only User (ATC staffs, Instructor…)
    - Level 2- ATC Administrator (Site Administrator)
    - Level 3- Distributor (Regional Distributor Administrator, staffs..)
    - Level 4- Autodesk Administrator (Super-User)

- Users given permission and usage rights with varied levels of access to systems functions; features determined for each user role

- Optimize the process to create, modify, manage & query partner profile

- Students are able to easily track their learning path across different sites and download the e-certificates

SYNCHRONIZATION

- Enhance data integrity by synchronization with multiple Autodesk internal platforms

- Decrease the routine task by streamlining the data workflow process

- DocuSign Agreement routing and signature process integrated with SF provides accurate legal agreement status

- Integrate Partner Enrollment Form   and Authorization Letter in SF

MOBILITY

- Use with all mobile devices and conduct survey anytime, any where

- Better user experience for surveying our next generation

- Drive more participation in   onl Evaluation Survey

SECURITY

- PDB-Only Distributor & Partners able to view data within the territory or organization

- TES-Enhance the validation process to prevent the misuse of course code and generation of fake certificates

- Limit the time student has to complete the survey to 30–days

- Secure, non-editable e-certificate PDF file

REPORTING

- Provide real-time, visualizing dashboard

- Improve reporting to be robust and customized for different purpose

- All reports are exportable, sharable (csv, xls, xlsx)

- Get customer insight and explore market trends of next generation

DASHBOARD

User Role	Dashboard Titles	Breakdown

Level 1- Partner Read Only User (ATC staffs incl. instructors)
 	
Level 2- Partner Administrator (Site Administrator)
	1. THIS MONTH SITE PERFORMANCE
	2. THIS MONTH COURSES DELIVERED BY PARTNERS
	3. THIS MONTH EVALUATION SURVEY TAKEN
	4. TOTAL EVALUATION SURVEY TAKEN
	5. OVERALL TOP 10 INSTRUCTORS' PERFORMANCE
	6. % OF CORE PRODUCTS AGAINST ALL COURSES DELIVERED BY PARTNERS
		1. Site performance
		2. By Instructors' names
		3. By Territory
		4. # of Evaluation survey
		5. By Core products' names
		   I. AutoCAD
		   II. Civil 3D
		   III. Inventor
		   IV. Revit
		   V. 3DS Max
		   VI. Maya
		   VII. Fusion
		   VIII. BIM 360
		   IX. All others
		6. By Territory
