

# The ThinkEDU - SheerID team takes on any integration and implementation work at no cost.

## HIGH-PERFORMANCE

Verification requests to one or more of our many secure identity data sources.

## ACCESSIBLE

The SheerID API is based on the principles of RESTful architecture and designed for true simplicity of integration.

## SECURE

SheerID takes security very seriously. All transport of service calls are conducted over 2048-bit RSA-encrypted HTTPS Certificate. No personally-identifiable information from any request is ever stored on our servers.

## SCALABLE

SheerID leverages cloud hosting providers such as Amazon EC2 to allow our service to quickly add capacity as needed.

## RELIABLE

Redundant hosting at every level of our infrastructure with automatic (cross-provider) fail-over guarantees high availability for our platform.

## FLEXIBLE

Easily able to customize the required level of verification, the techniques used to verify, and the groups of consumers, to target.
