

Displaying Unity Workshops and Reflect pages on a WP site.

After downloading and extracting the Unity_workshops.zip file. Copy the “uws” folder and it’s contents and paste or copy it into your wp-content folder/directory. This “uws” folder has all the HTML and dependencies to display the page.

Next, download and install the Advanced iFrame plugin.

Plugin: Advanced iFrame

<https://wordpress.org/plugins/advanced-iframe/>

Once installed, you can create your own Advanced iFrame shortcode using the plugin, or in most cases simply use the short codes for each page below. You will need to change the src link “[website.com](#)” to your domain name.

iFrame shortcode for Unity Workshops page: Cut and paste shortcode into page.

```
[advanced_iframe use_shortcode_attributes_only="true"
src="https://website.com/wp-content/uws/unity-workshops.html" width="100%" scrolling="no"
name="Unity Workshops" class="iframe-responsive"]
```

iFrame shortcode for Unity Reflect Workshop page: Cut and paste shortcode into page.

```
[advanced_iframe use_shortcode_attributes_only="true"
src="https://website.com/wp-content/uws/unity-reflect-workshop.html" width="100%"
scrolling="no" name="Unity Reflect Workshop" class="iframe-responsive-reflect"]
```

iFrame height adjustment

Advanced iFrame has a tutorial for creating dynamic responsive heights, however, this requires the pro version to work. See link below.

<http://www.tinywebgallery.com/blog/advanced-iframe/advanced-iframe-pro-demo/responsive-iframes>

iFrame height adjustment without the pro version

Add the media query below to your WP custom CSS. This controls the height for responsive iFrame height without a pro version.

```
.iframe-responsive {
    height: 5800px;
}
```

```
@media (max-width: 768px) {  
  .iframe-responsive {  
    height: 9800px;  
  }  
}
```

```
@media (max-width: 320px) {  
  .iframe-responsive {  
    height: 12200px;  
  }  
}
```

```
.iframe-responsive-reflect {  
  height: 4700px;  
}
```

```
@media (max-width: 768px) {  
  .iframe-responsive-reflect {  
    height: 5120px;  
  }  
}
```

```
@media (max-width: 320px) {  
  .iframe-responsive-reflect {  
    height: 5700px;  
  }  
}
```
